TECHNICAL SKILLS

- Java
- Linux (basic)
- AWS
- CI/CD
- Jenkins
- Git
- Github
- Terraform
- Prometheus
- Grafana

CERTIFICATIONS

1. COMPLETED PYTHON TRAINING IN SPOKEN TUTORIAL
2. COMPLETED INTRODUCTION TO COMPUTER TRAINING IN SPOKEN TUTORIAL
3. COMPLETED ARDUINO TRAINING IN SPOKEN TUTORIAL
4. COMPLETED PYTHONBASIC AT DIGILABS

CO-CURRICULAR ACTIVITY

- **Project presents on "AUTOMATIC BLIND TIME WRECK CONTROL SYSTEM"** in National level Technical Symposium at VELAGAPUDI RAMAKRISHNA SIDDHARTHA ENGINEERING COLLEGE

PROFILE SUMMARY

Graduate with Strong foundation in electronic principles complemented by hands-on experience in programming and software development. Innovative electronic engineering transitioning to both software development and hardware development roles in companies.

ACADEMIE PROJECTS

- AUTOMATIC BLIND TIME WRECK CONTROL SYSTEM
- AUTOMATIC BLIND TIME WRECK CONTROL SYSTEM USING ODUM
- SNAZZY GILDER USING BECKON
- FAKE SMS SPAM ANALYSIS USING AI
- CEREBROVASCULAR CRISIS DETECTOR
- AN EFFICIENT VLSI BASED IMAGE ENHANCEMENT USING VHDL

EDUCATION

Bachelor of Engineering in Electronics and Communications Engineering
Kongunadu College of Engineering and Technology, India
CGPA: 8.12 / 10

LANGUAGE

- Tamil
Full Professional Proficiency
- English
Full Professional Proficiency

- **Paper presents on** AUTOMATIC BLIND TIME WRECK CONTROL SYSTEM USING ODIUM" in National level Technical Symposium at VELAGAPUDI RAMAKRISHNA SIDDHARTHA ENGINEERING COLLEGE.

- **Paper presents on** "SNAZZY GILDER USING BECKON" at KONGUNADU COLLEGE OF ENGINEERING AND TECHNOLOGY.

AREA OF INTEREST

- DevOps Engineer
- Web Developer
- Software Developer

ACHIEVEMENT

- Secured 2nd place in handball in "Zone 14" at Trichy(2024)
- Secured 3rd place in handball in "Zone 14" at Trichy(2023)

WORK EXPERIENCE

Product Engineer – Testing

Tata Electronics Pvt. Ltd. — [Chennai]

- Performed functional, reliability, and performance testing of semiconductor and electronic products to ensure compliance with quality standards.
- Developed and executed detailed test plans, test cases, and validation procedures while automating repetitive testing processes using Bash scripting, improving efficiency and reducing manual effort.
- Worked extensively with the Bash scripting language to streamline testing tasks and automate workflows.
- Analyzed large datasets, generated reports, and provided actionable insights that contributed to defect reduction and yield improvement. Optimized testing workflows, enhanced processes, and contributed to improving overall product reliability through continuous monitoring and feedback mechanisms.
